

# FloSat

## Features:

- Real Time Survey Information
- Familiar Map Interface
- Multiple Wells, Single Interface

A satellite modem is available for use with the ProView that allows connectivity to the FloSat website. The FloSat website allows users to view data as it is updated in real time from the well site. Alerts can be sent via email or SMS, or can also be viewed on the website.

Teledrift also offers smart phone applications enabled to display FloSat data transmitted from the tools.
