

ProView X

Features:

- Touch screen interface
- Real time mud pulse graph
- View azimuth and inclination data
- View and accept surveys
- Playback previous survey
- Satellite modem
- Associated Web based features
 - Transmits to FloSat Website
 - Online data backup
 - Online data viewing
 - TVD plots show current well profile
 - Bidirectional text and emergency messaging
 - Job locations show on live interactive map
 - Remote viewing of downhole tool events
 - Notification by text and email messaging

Mechanical Specifications

Length	12.52" (318.00 mm)
Width	5.18" (131.572 mm)
Height	14.03" (356.362 mm)
Weight	30 lbs (13.6 Kg)

Operating Specifications

Maximum Operation Temperature	150°F (65°C)
-------------------------------	--------------

The ProView-X surface decoder provides a user friendly touch screen interface that allows the operator to easily view surveys and a real time graph of mud pulses sent to the surface from the down hole tool. Data can be saved to a USB memory stick for backup or later viewing. The ProView-X generates survey reports from the data that is received from the tool.

A satellite modem is also available which transmits data to the FloSat website, Android™ and iPhone® apps.
